

TRU-CLIP CONNECTOR

GUARANTEE THE PERFECT CLIP

When maximizing safety is your top priority, choose the connector that removes human error from the equation. TRU-CLIP's robust sequenced connection can't be undone until the climber returns safely back to the ground. Unlike other locking connectors, TRU-CLIP's intuitive attachment system is kid-friendly, requiring minimal operator supervision. With TRU-CLIP, users of all ages and experience levels can climb safely and independently!
