PANDION STEEL

Designed for group use, the PANDION STEEL is an adjustable and durable harness. It features a single attachment point, making it easier to set up belay systems and allowing for a quick visual check. The reinforced attachment point and thick webbing make it very durable for intensive use. Two gear loops allow users to carry equipment. Identification and marking areas simplify equipment inventory management.

Gray/orange color coding on the leg loops makes it easier to give donning instructions to participants.

Quick and easy adjustment with DOUBLEBACK buckles.

Two gear loops make it easy to carry equipment.

The single attachment point is color-coded green, making it easier to install belay systems and allowing for a quick visual check.

Short Description	Easy-to-use and durable sit harness for group use
Selling Points	• Easy-to-use sit harness with gear loops, designed for groups use: - Gray/orange color coding on the leg loops makes it easier to give donning instructions to participants - Quickly and smoothly adjust waistbelt with a DOUBLEBACK buckle - Excellent grip on webbing ends makes adjusting the waistbelt and leg loops easier, even with gloves on - Single attachment point is color-coded green, making it easier to install equipment and allowing for a quick visual check - Two gear loops make it easy to carry equipment • Excellent durability for easy maintenance and optimized lifespan: - Reinforced attachment point - Webbing designed for intensive use and smooth adjustment • Easy equipment management for the operator and staff: - Adjustment options at the waistbelt (51 to 120 cm) and leg loops (31 to 75 cm) allow the single size to fit a wide range of body sizes - Marking area on the outside of the harness for easy identification when stored - Identification panel on the harness to track the equipment throughout its lifespan - Easy to clean • Available individually or in packs of five
